HOSPITAL EMERGENCY ROOM DASHBOARD

KEY TAKEAWAYS

1/1/2024

6/30/2024

Hospital ER Dashboard Analysis (April 2023 – October 2024)

Patient Wait Time & Satisfaction

- The **average patient wait time remained around 35 minutes**, indicating a stable emergency department workflow throughout the reporting period.
- The **average patient satisfaction score was 5/10**, suggesting a moderate patient experience with opportunities to improve service quality and waiting experience.
- Satisfaction data is incomplete for many patients, so the reported score should be interpreted with caution.

Departmental Referrals

- **General Practice** received the highest number of referrals, making it the primary destination for follow-up care.
- **Orthopedics** ranked second, reflecting a significant number of injury and musculoskeletal cases.
- Referrals to **Cardiology, Neurology, and Physiotherapy** were comparatively lower, indicating more specialized patient needs.

Peak Busy Periods

- Patient arrivals remained relatively consistent across the reporting period.
- **May and August** recorded the highest patient volumes, indicating seasonal peaks in ER demand.
- No significant fluctuations were observed, demonstrating a steady flow of emergency visits throughout the year.

Patient Demographics

- The emergency department served patients across all age groups, with an **average age of approximately 40 years**.
- Gender distribution was well balanced, with **male patients accounting for just over half of total visits**.
- This reflects a diverse patient population requiring a broad range of emergency healthcare services.

Race Distribution

- The patient population was predominantly **White**, followed by **African American, Asian**, and individuals identifying with **Two or More Races**.
- A small proportion of patients chose not to disclose their race.
- The distribution highlights the importance of delivering equitable and inclusive healthcare services.

Admission Patterns

- Approximately **50% of patients were admitted**, while the remaining **50% were treated and discharged**.
- The balanced admission rate indicates that the ER effectively managed both critical cases requiring hospitalization and less severe cases suitable for discharge.

Executive Summary

From **April 2023 to October 2024**, the Emergency Room maintained a **steady patient volume**, with average wait times around **35 minutes** and a balanced **50% admission rate**. Patient demographics remained diverse across age, gender, and race. General Practice dominated departmental referrals, while seasonal peaks occurred during **May and August**. Although patient satisfaction averaged **5/10**, incomplete feedback data suggests that additional patient response collection would provide a more accurate measure of service quality. Overall, the dashboard indicates consistent operational performance while highlighting opportunities to improve patient experience and satisfaction.
